

Moving forward with Shared Health

April 5, 2019 is the official date when HSC becomes part of Shared Health.

The various transition work streams, especially Human Resources, have done a tremendous amount of detailed planning. Their efforts are making this transition as easy and smooth as possible for staff. In fact, for most of us the biggest change will be the name of the employer on our pay statements.

What staff need to know

In the first week of April, information for staff will be posted to HSC Home. Please ensure you take time to review the messages from Brock Wright CEO Shared Health, Ronan Segrave HSC COO, and Réal Cloutier WRHA President.

An info package specifically for HSC staff will also be available on HSC Home, with answers to some frequently asked questions and guidance for day-to-day items such as templates, stationery, and policy.

HSC staff transition letters

By now HSC staff should have received their welcome-to-Shared-Health letters in the mail. If you have not yet received a letter, notify ExecTeam@hsc.mb.ca and include your name and employee number.

HSC and WRHA

While HSC no longer reports to WRHA, our relationship will continue to be collaborative and respectful as we support integrated, sustainable patient care.

HSC will continue to work with all of Manitoba's Regional Health Authorities, including WRHA, towards our goal of seamless delivery of services for patients from urban, rural and remote communities.

Our unique role

HSC is the only hospital within Shared Health. This reflects our historic and ongoing role as Manitoba's hospital – providing complex, specialist acute care to adults and children from all regions of our province.

We will continue to welcome and care for patients from across the province. Whether we care for adults or children, we are one HSC. Whether we care for patients or support those who care for patients, we are one HSC.

Asked & Answered

Do you have questions about transition to Shared Health and how it affects you? Visit "Asked & Answered" on the News Share site: <http://news.sharedhealthmb.ca>. Visit the News Share often to learn more about Shared Health and about the work we do to improve health care for Manitobans.

Personal well-being resources

Please remember that if you need support during these changes, don't hesitate to seek help from your Manager, Union Representative, Human Resources, or the confidential and free Employee Assistance Program: 204-786-8880.
