

Good Day Mr. Friesen,

I am contacting you to add my displeasure as well as the ire of the large number of professional nurses that I represent at Local 10 HSC regarding the absolute misrepresentation of our profession and the important, significant and lifesaving and life supporting work that nurses engage in each and every day. The ads that were featured on the Government of Manitoba website are so demeaning and unrealistic that I find it difficult to articulate how insulted the nurses at the "province's Hospital" are feeling. It is immensely obvious that this current government has no idea what nurses do or who nurses are as evidenced by the frivolous nature of the ads and how nurses were depicted in them. I would further advise that an error of this magnitude will not be forgotten during the next election. Nurses are important members of the health care team in this province and are more than angered, disgusted and fed up with the systematic dismantling of CARE in this province and we will not be silent about how this government has completely lost touch of this all important service and those that work above and beyond to provide it!

Lana Penner  
President  
Manitoba Nurses Union  
Health Sciences Centre Local 10
